

# CHELSEA CONCRETE TABLE

## INSTALLATION INSTRUCTIONS

SKU: TBL-CHEL

Thank you for choosing Trueform Concrete.

CHELSEA is a minimalist concrete table designed to make a statement in your home.

This table is shipped in separate pieces in order to prevent damage from transit. Light assembly is therefore required. Caution: These pieces are heavy, so assembly will require at least two people.

For the best results, **please read these instructions in their entirety** to understand the complete process before you begin.

### Hardware Provided

16 stainless steel panhead screws, 3/4" long

### Items Required

- Power drill
- Phillips-Head bit
- Phillips-Head screwdriver
- Measuring Tape

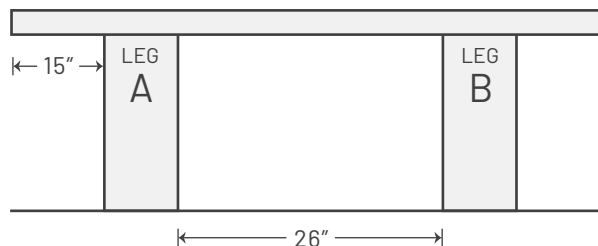

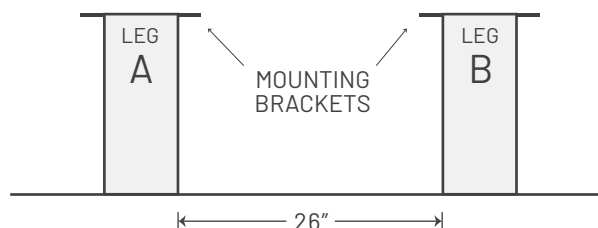

# CHELSEA CONCRETE TABLE

## INSTALLATION INSTRUCTIONS

SKU: TBL-CHEL

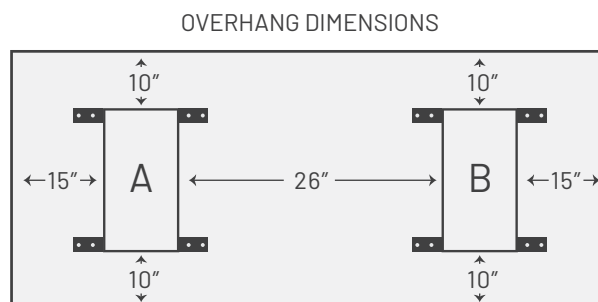

### Positioning the legs

1. The underside (subdeck) of the top has been predrilled to accept mounting screws. Two locations under the top will be marked with colored circles that correspond to similar marks on legs' mounting brackets. This is done to ensure the top is orientated properly and the holes align with the brackets. Identify these marks on both the top and base.
2. Place the legs in their intended final locations with the mounting brackets facing up. Ensure the legs are spaced 26" apart and parallel to each other. Also ensure the legs are positioned so that the colored circles on the brackets will align with those on the subdeck.

### Placing the top

2. Place the top on the legs, centering it as well as you can by eye. Once the top is on, make small adjustments by lifting the top until it is in the correct position using the OVERHANG DIMENSIONS to the right. **Do not push** the top at this time as it may collapse the legs. Verify the overhang is correct on all sides and all holes align using a measuring tape.
4. Using a power drill with a Phillips-Head bit, drives screws through each of the 8 mounting brackets and into the wooden subdeck. You may wish to tighten with a Phillips-head screwdriver to avoid stripping the pilot hole.

If you purchased a custom-sized CHELSEA, follow the directions to the left while referring to the overhang dimensions provided in your technical drawing.

**Note:** If the table needs to be moved at any point, it is strongly advised to detach the table top and move the pieces separately.

That should do it! We hope you enjoy your Chelsea Table. If you have any questions or need assistance, feel free to reach us at 888-474-7977 or at [info@trueformconcrete.com](mailto:info@trueformconcrete.com).
